Claims History Release Form

st.lukeshealth

Who on the policy can access claims history?

All persons covered by the policy can access their own claims history. The policy holder and his/her partner can also access the claims history of any dependant up to the age of 16. If you wish to access the claims history of another adult or dependant over the age of 16, who is also covered on your policy, we will require prior authorisation from that person in order to release their claims history to you. This is in accordance with the Australian Privacy Principles in the *Privacy Act 1988* (Commonwealth)

If your partner or dependant over 16 agrees to authorise the access of their claims history through Member Services, can you please have them complete and sign the authority below and return it to us. (their claims history will be released within 2 working days of St.LukesHealth receiving this authorisation.)

I hereby authorise the release of my claims history detail through online member services for viewing by other persons covered on this policy.
